

Data

Diamond Data is your one source for internal and third-party data.

Simplify the extraction of data with a single source transaction repository, and gain real-time operational data reports and dashboards that can help you drive forward-looking decisions.

- **Operational Data Analytics**

Transform key performance indicators into visually stunning operational dashboards that are updated in real-time.

- **Analytics' Business Intelligence**

Track critical daily operations and make real-time adjustments to improve performance and efficiency. The platform allows Insuresoft's clients to run both operational reporting and high-speed analysis on the data warehouse simultaneously.

Comparison Chart

Basic reporting, business intelligence, data analytics, data warehousing, or a 360° view of your customers are all available through Diamond Data. Whatever you need, Insuresoft can help. All of our data analytics solutions are seamlessly integrated into Diamond.
