

Diamond

An All-in-One System That Lets You Shine?

You got it.

From policy admin and claims management, to billing, reinsurance, portals, datahub, and business analytics... Diamond is the only one core processing system you'll ever need.

It gives you the edge when it comes to building trusted relationships. It empowers your teams to deliver on your customer promise, while offering partners and policyholders the experience they want today — before they demand it tomorrow. Get your shine on, with Diamond.

All P&C Lines of Business

Diamond provides end-to-end insurance processing for all P&C lines of business including personal, commercial, specialty, farm and workers compensation - so you don't need to license multiple platforms.

One Holistic System

Diamond is a single, holistic system rather than multiple systems that are loosely integrated. This allows for system-wide transaction updates across the enterprise to all authorized users.

150+ Pre-Built Integrations

Diamond is an API-First design offering over 150+ pre-built integrations through our Partnership Ecosystem.

Reduce implementation risks

We believe the best people to implement your system are the people who built it. So we don't rely on 3rd parties as implementation is 100% onshore by our staff of insurance experts. This process have been proven successful as we enjoy a perfect record of getting insurers into production for more than 30 years.

Powered by Composer

With Insuresoft Composer, Diamond allows each organization to choose the level of control that best fits its business, from self-service configuration to vendor-assisted support.

"Our company has deployed our new and innovative product on the Insuresoft platform in multiple states over the past 12 months. We have been extremely impressed by their ability to changing requirements driven by market dynamics. The entire Insuresoft team has a breadth of industry experience that contributes to high quality implementations."

James Pooley

President,
Bluefire Insurance

"As our most trusted technology partner, Insuresoft has delivered a state-of-the-art comprehensive insurance solution that has exceeded our expectations. Above all else, Insuresoft's team has demonstrated a commitment to our success which is unrivaled by other business partners."

Scott Walker, CPCU, AIM

Sr. Vice President,
Mendota Insurance
